## DESK BASE

TYPES : SR & SF

**A** MUCH superior desk stand is now available, this is highly compact yet entirely stable, and offers a quite unique convenience in use.

A pressure MAZAK diecasting dimensioning  $4\frac{1}{2}'' \times 3\frac{1}{4}''$  is arranged with a cable slot and recessed to accept our standard 3-pin external run plug. A captive nut is fitted for locking; and the base provided with four unshearable recessed rubber feet, screw attached. This design permits our normal stand fitting to be immediately transferred to the desk base merely by removing the sleeve, thus offering universal choice of mount with a single cable.

An alternative silent cushioning in place of the rubber feet can also be furnished, this supporting the base on polyurethane foam pads with felt laminae. Such a base provides full insulation from mechanical noise pickup and slides easily on a plane surface. It is very well suited to permanent installations in conference rooms.

When permanent fixture to a desk base is intended it is possible to fit a slide switch for muting. Alternatively of course such provision is available by use of a second cable, for the microphones remove at the plug.

Microphones acceptable to this base are any fitted with the external run plug, thus :

RBL/T — RBM/T — RBH/T — REL/WS — RBS/WS — CRL —  
CRM — CRH — RVA/S — RVB/S — RVC/S — PGD/S — DP  
(flexible arm).

The base is finished with baked grey hammer enamel with inset RESLO escutcheon.

List prices :

Type SR Base only, with rubber feet	...	£1 5 0
Type SF " " " foam pads	...	£1 10 0
Extra for muting switch	...	10 0
